

ENVIRO ENZYME D'ODOUR **Contains active microbial enzyme**

Advantages:

- Rapidly digests a broad spectrum of organic waste
- Self-limiting and fully biodegradable
- Possesses powerful anti-bacterial properties
- Rapidly digests fats oil & grease
- Digests amines which are the compounds that attract many insects such as flies and cockroaches
- Prevents drain blockages
- Reduces odours
- Safe to use, non-corrosive and non-pathogenic
- Safe for the environment

Physical Properties:

pH : 1.5-9.6 wide range of operative conditions
Oxygen Content: 0.5 ppm + Facultative Anaerobe /Aerobic
Salinity : up to 65,000ppm Effective in Saline Conditions
Temperature : 0-65 C Wide temperature range
Chlorine : up to 3ppm Operative in moderate chlorine

How to use:

1 DOSE= 50ML

Drain line and down pipes

Initial treatment: 3 doses during the first week. Use at least one dose once per week in standard pipes. Usage rate should be increased for large drain lines and extended pipe lengths. For multi-stories buildings, treat each floor every day from ground upwards during the first week. Thereafter, add ENVIRO ENZYME D-ODOUR weekly from the upper floor.

Small grease Traps

One dose weekly per 50 meals per day. Initial treatment (seeding) 3 times greater during the first week. Add ENVIRO ENZYME D-ODOUR directly to the kitchen sink or pipe next to the grease trap at night, then flush down with lukewarm water.

Septic Tanks

Initial treatment – 5 doses per 1 cubic meter of tank, thereafter 1 dose every two weeks. Pour directly into the toilet bowl and flush.

Carpets

Micro-organisms destroy the root cause of odours. ENVIRO ENZYME D-ODOUR will control odours from pets and organic spills. Dilute 1L solution with 10L of water and spray onto the carpets and completely wet area. Scrub the surface and allow the micro-organisms to work in between the fibres overnight. Allow to dry and then vacuum clean.

Cats & Pet Litters

Dilute 1L solution with 10L water and spray onto the pet litter or contaminated area or as required. ENVIRO ENZYME D-ODOUR will control odours.

Urinals

Spray 1L solution of ENVIRO ENZYME D-ODOUR in 10L water on each urinal daily or as required according to usage.

Bathroom and shower floors and surfaces

General Surfaces

1L solution diluted with 10L warm water. Spray onto the surface to be treated weekly.

Deep cleaning of floors

Use diluted with warm water. Spray onto the surface to be treated when planning a deep clean.

Deep Freezers & Refrigerators

Bad odour contaminated appliances can be treated with a 1L solution in 10L water. Spray ENVIRO ENZYME D-ODOUR onto the empty interior and seals and leave for 3 or 4 hours, or overnight. Then wash with a neutral detergent.

Toxicology and First Aid:

Inhalation: Should be no effects but remove person to fresh air if there is any throat irritation

Skin contact: Should be no effects but rinse area with water if symptoms arise.

Eye contact: Flush eyes with clean water for at least 15 minutes and seek medical advice if symptoms persist.

Ingestion: Rinse mouth with water. Do not induce vomiting. Seek medical advice if symptoms persist.

Storage and Handling:

Store this product in a cool, dry, dark, locked room. This product must be stored in a place where it cannot be accidentally knocked over and it must be out of reach of children. Containers holding this product must be tightly sealed when not in use, Dispose only in accordance with Local Authority regulations, via authorised disposal agent. Do not mix with other chemicals.

The recommendations are based on laboratory tests and in field use experiments. To the best of our knowledge these are accurate and since conditions of actual use are beyond our control, all recommendations are made without any warranty whatsoever
